# Industrial Troubleshooting

The industrial troubleshooting service at **Rubber Consultants** consists of a team of highly experienced engineers and technologists capable of delivering practical solutions to real life technological problems.

## Do you have manufacturing problems?

- High reject rates?
- Inadequate quality?
- Poor product appearance?
- Poor service life?

## Possible causes

- Poor part and mould design
- Inadequate formulation design
- Mixing problems
- Contamination (raw material or during processing)
- Lack of process control and process optimisation
- Incorrect vulcanisation

## The solution

Call on **Rubber Consultants** confidential industrial trouble-shooting service.

Causes of problems will be identified using modern analytical equipment, material characterisation tests, simulation software and staff experienced in using the results to solve practical problems.
